

Please do not allow the media giants to further destroy our ability to gain a diverse range of news, music, and opinion. When these corporations control the airways we are all disadvantaged. The current level of competition in many markets is virtually non-existent, and we are being force-fed a sterilized version of what might be presented if these huge media companies were not monopolizing the advertising dollars. If you allow these companies to gain an even stronger hold on the market you will destroy one of the greatest assets our country possesses - freedom of speech. I hope you will realize there are more important things in our country than money.
